*You have the opportunity to share your event or leftover food with campus!*

The BAND application is an effort dedicated to ensuring all college students are food secure. By activating this powerful resource, the Slippery Rock campus will strengthen its community by empowering its event organizers to reduce food waste by sharing left over food with students, faculty, staff, and campus community members. In addition to ending college hunger, the app will also connect folks to a network of valuable community resources.

## HOW IT WORKS

The organizer posts on the app when they want to advertise free food or leftover food from an event.

Campus community members see the post and go to the event location for a meal.

- Under Aramark's discretion, food must be eaten on site and not moved to any other location.
- All service must adhere to food safety standards. Food exceeding time temperature standards may not be served.
- Food available at Event Coordinators discretion.
- Aramark will not provide takeout containers, additional plates, etc.

## JOIN US!

Download the BAND app and end student food insecurity!
